Northern Saskatchewan Poor But South Makes Good Showing—Growth Is Late

WINNIPEG, Man., July 23.—Those in Winnipeg close to the situation and best qualified to give an informed opinion, refuse to believe that Western Canada's wheat acreage is the average in the extremely serious condition pictured by Chicago "exporters" on the strength of which reports the local market jumped about six cents today.

Fredrickson of a crop of about 300,000 bushels can be held out to be reasonable, and the Chicago reports that not more than 200,000 bushels can be expected from the three prairie provinces are characterized as ridiculously low.

The report that the Alberta crop will not exceed 40,000 bushels is contradicted by the Provincial Minister of Agriculture, as "a bad guess" although on the other hand John J. Macfarlane, an important Calgary grain dealer, says the total will reach 50,000,000.

Wheat Dealers Worried

It has been admitted for several days that Northern Saskatchewan is in a bad way, but it is pointed out here that approximately six days per cent of the crop is as good as average years.

Frank's Tells of Getting Ransom Letter After Son Was Slain—15 Heard

CHICAGO, July 23.—Nathan Leopold, Jr., and Richard Loeb, slayers of Robert Franks, faced the sorrowing parents of their boy victim today at the bar of justice.

They watched them on the witness stand as they told, with tear-moistened eyes, the story of their son's disappearance and heard his voices whisper affirmative answers to the State's proffered exhibits of the little fellow's clothing.

On the part of the para-judicially brilliant but criminal defendants there was no display of emotion.

Leopold, metedown, and with an expression of only casual interest on his features, watched the mother of young Robert Franks with amazed blinking of an eye. Loeb, on the other hand, gave little signs of perturbation.

Leopold, Jr., however, Loeb showed some reaction to the proceedings. He came into court with eyes staring and jaw pendulous and frequently turned his face or picked at threads on his sleeve.

Leopold, Jr., the younger whose academic achievements were outstanding were in court today for the first day's hearing before Judge Nathan.

Facing the State Attorney, Crowe, the "most cruel, cowardly and heartless murderer ever committed to the history of American jurisprudence," the 21-year-old defendant apparently found mental stimulus in emotional effect of the proceedings.

In a brief pause which followed the testimony of the witness, the defendants whispered:

FATHER TESTIFIES Iridium Find Is Reported From North

Precious Metal, More Valuable Than Gold, Discovered on Peace River

COMPANY HAS FILED TEN MILES OF CLAIMS

Firm Sends Machinery To Develop Field—Stampe By Miners Expected

One of the most valuable minerals in the world today—iridium—has been discovered in the upper waters of the Peace River, down stream from Hudson's Hope, by the Canyon Gold Mining Co.

Yesterday the representative of an Edmonton syndicate returned from the North after having filed claims for ten miles along the river, and he is of the opinion that a real old-time stampede will result as soon as the matter is noised abroad.

The mineral was first brought to light last spring when the Canyon Gold Mining Co., was drilling for gold. The drill, carried down the river, revealed iridium in almost every hole.

CHINESE IS ARRESTED

Montreal Police Think Celestial's Intention Was To Make Human Sacrifice

MONTREAL, July 23.—Thought by the police to have been intended to make a human sacrifice, an eleven-month-old white baby was found by the police early this morning.

The baby was found in a pre-embalmer surrounded with kindling wood. The wood, the child's clothing and the upholstery of the pre-embalmer were all soaked in kerosene.

A lighted railway man's lantern was found near the body of the baby. The police are now searching for the person who placed the baby in the pre-embalmer.

When the Celestial bodyguard was found, he was said to have been working in the Peace Valley for some time.

Young Child Found after 2 Day Search

Three-Year-Old Son Of Samuel Anderson Tawatinaw, Wanders in Wilds

BOY GOES WITHOUT FOOD AND SHELTER

Party Discovers Lad Sitting Unharmed On Stream Bank

TAWATINAW, July 23.—Wandering alone in the wilds without food or shelter for two days, little Bobby Anderson, three-year-old son of Samuel Anderson, who lives on the west of the town, was found by a search party last night sitting on the bank of a stream, and apparently none the worse for his prolonged absence from home.

Bobby had been playing in the sand on the bank of a stream Sunday afternoon, but when his mother called him in the evening there was no answer.

A quick search of the precincts of the house was unsuccessful in locating the little lad, and many searchers thought the stricken mother.

When Mr. Anderson returned from the fields another search was made, but still there was no success, and, overcome with apprehension, he called the police.

Through the night the anxious parents kept up the search, and on Monday morning Constable Hickey of the A.P.S. of Tawatinaw arrived on the scene to organize a search party.

Many willing volunteers were available in Tawatinaw, and a party of men set out for the Anderson home to search for the missing boy.

Some Of The Occupants Jump And Are Hurled Free Of The Wreckage—Dead Bodies Are Thrown In Air

OAK HARBOR, Ohio, July 23.—Ten persons were killed and ten others injured, some seriously, when a New York Central passenger train crashed into an automobile truck at a grade crossing outside this village.

There were twenty-six persons in the truck. They had been on a day's outing at Sand Beach, on Lake Erie, and were returning to their homes when the accident happened.

Witnesses of the accident declared that the driver of the car had stopped the machine at the railroad crossing, gone ahead to look at the wreckage, and apparently had failed to see the approaching train. He is said to have gotten back into the truck and driven onto the tracks directly ahead of the train, which was bound for Toledo from Cleveland.

TWO SPLENDID FOOTBALL TEAMS BATTLE

CALEDONIANS DEFEAT THE BEVERLY ELEVEN, 4 TO 0

Winners Show Considerable Superiority Over The Suburban Team—Callies' Defense Is Strong At All Times In Contest

BENNETT SHIELD SERIES PRODUCTIVE OF SNAPPY, EVENLY CONTESTED MATCH

Neither Side Scored In The First Half, But Callies Launch Determined Attack In Second Which Brings Results—Counter-Attacks Are Repulsed

Callies showed considerable superiority over the suburban team from Beverly at Renfrew Park last night, when they defeated them in the local Bennett Shield series by four goals to nothing. The game in the first half was evenly contested, both teams attacking with considerable vim, although the score at half time was even with a clear sheet. It was in the second half that the Callies drew ahead, and after the first goal was scored forwards well in check. The game was a good one to watch from a spectator's point of view, and thus clearly fought out.

The Callies' defense was changed around somewhat, but remained strong. Harniss, who played at back, was good, and Anderson, who played up front, was better at back than in the forward line. Smith in goal was not troubled much, and the Callies played a steady game. Harniss took Reid's place at right half, and back, while Callies and back, played a great game, and the half line was the mainstay of the team. Callies and Harniss on the left wing were the pick of the forwards and showed some very fine combination. Harniss is a new-comer to the Callie team, and looked as if he will make good. Charlie Reid, who filled the inside right position, worked hard, but was not at home among the forwards. Reid and Thompson were fair, each getting the list of scores.

Harniss, the Beverly goal, could not be blamed for any of the goals which got away from him, and showed several good saves. Station was good at back, and saved Beverly in many a time when things looked black for his team. The half line was fair, with Cowden looking the best of the bunch. The forwards did not have much chance to show their wares. The Callies' defense kept them out of the game, and their backs were the best of the bunch, but his creases were not made as much use of as they might have been.

Callies won the toss, and elected to play towards the south goal. Beverly were the first to attack, and the Callies goal had a close call. When Denim's cross was missed in front of goal, Jack Thompson for the Callies got past the defense and tested Harniss twice, but the goalies were safe, and got the ball. The play was winning from end to end, and both teams attacked with vim, but the shooting was not of a dangerous nature. Harniss, who had a good shot, was away from Thompson for the Callies, and a good corner was taken. Reid and Chapman got away on the right. Beverly's first cross caused the Callies' defense some concern, but was safely repulsed at half time, and on a score.

The Callies attacked on the re-

RITCHIE-SHILLOH TO PLAY TONIGHT

Ritchie and Shilloh will play a scheduled Intermediate league baseball game tonight starting at seven o'clock at the South Side Athletic Grounds. This should be a first class game as both the teams are well balanced and they should be able to put up a fine battle for the evening's honors.

"Buddy" Warner and Rowley will handle the better work for the Ritchie team, while Shilloh and Graham will work the deliveries for the Shilloh team.

Incidentally Ritchie is the only ball team in the Intermediate league that plays their home games on the South Side.

FARMERS DRIVEN TO DESPERATION

Requests Pour In For Removal To Land Blessed With Rain

NO ACTION YET

Province Seeks Light on Living Conditions In Alberta Dry Belt

Agents of the Department of Agriculture have already begun making a survey in the drought-stricken areas of the province as well as in the rest of the country. "The basic working policy will be to assist the migration of farmers from these districts to a good crop-producing area," said the Minister. "It has been made the Government's" said the Hon. George Hoadley, Minister of Agriculture, "to transfer farmers, municipal officials, and other organizations for transfers from drought areas to irrigated lands, or to areas where the drought did not exist and in some cases they have been accompanied by actual requests for removal."

"No action, however, will be taken," according to the Minister.

"We all endeavor to find out," says Mr. Hoadley, "the exact situation in the case, including such details as the farmer's financial condition, the amount of stock he has, his stock of farm implements, his experience he has had, and whether he wishes to take up irrigated land, or a homestead in some other part of the Province."

Already there has been a small movement of farmers from the dry areas of Central and Southern Alberta to irrigated lands belonging to the Canadian Pacific land watering system, on which they will take up dairying and cattle raising.

No arrangements have yet been made for the purchase of land.

About one hundred families were moved last year to new farms, mostly in mid-northern Alberta, where new homes were purchased on the crop payment plan, or on other terms.

MILD SCARLET FEVER IS SEEN AS MENACE

Dr. Whitelaw Says Many Cases Are Not Recognized and Spread Disease

Mild cases of Scarlet Fever, which are never diagnosed as such, are responsible for more infection than instances of breaking quarantine regulations, Dr. Whitelaw said today, speaking at the meeting of the Board of Health held Tuesday night.

Quarantine regulations are not adhered to as closely as they might be, Dr. Whitelaw said, and a suggestion that the regulations be enforced more stringently was supported by the meeting.

An attempt to be made by the Board to induce all houses suspected

connected up. In cases where financial difficulties must be overcome, it was thought that the city might provide the connections and receive payment in instalments on the local improvement plan.

CAR CRASHES INTO BIG SHOW WINDOW

An automobile crashed into a large plate glass window in front of J. J. Clark's hardware and grocery store, 1114th Avenue, on Tuesday night and, according to

The framework of the window was also damaged, and the police hope to have information regarding the owner of the car at an early date.

A special meeting of the Edmonton Dog Fanciers Club will be held on Thursday, July 24, at eight-fifteen P.M., in the Civic Block. All members of the Club have been requested to be present on account of important business to be transacted.

CONSERVATION OF VISION BROUGHT BEFORE TEACHERS

"Sight Saving Classes" it may be said, are classes for the blind, and ordinary schools for sighted children, to which pupils are admitted whose vision is so far defective as to render it impossible for them to receive their education in schools especially provided for them. But the teachers of the sight saving classes are not so much concerned with the physical condition of their pupils as with the mental and moral development of the child. They are not so much concerned with the physical condition of their pupils as with the mental and moral development of the child. They are not so much concerned with the physical condition of their pupils as with the mental and moral development of the child.

In an introductory lecture to a series of lectures on the conservation of vision, given at the University of Toronto, the speaker pointed out that the eyes are the most important organs of the human body, and that the conservation of vision is the most important thing in life.

WHICH

Would You Choose?

The love of a world-wise woman

--- OR ---
The love of an untaught young child?

This problem that faces Philip Lambert, who, rejected in love because maimed, seeks rest in the land of sunshine. Read "The Heart of Carmencita," by Dingie E. Roe, a gripping love tale, in the Saturday Magazine Section of The Bulletin.

Alberta Payson Terhune, that notable writer of good fiction, has a story of mystery, action and suspense, "Poison Gas." It tells of a lawyer trained in crime detection who evolves a perfect plan for the elimination of his rival by an up-to-date method. You will not want to miss this story.

Half way on the road of 1924—half the year is gone—what of the other half? Answer that. Read Winsor McCay's illustrated editorial for inspirational ideas.

"Opening a Continent to the Ships of the World," is the name of an informative article about the St. Lawrence Ship Canal.

This project, which will stimulate the centre of a continent, when completed, is being jointly furthered by Canada and United States. The article, by W. R. Plewman, is illustrated by large maps and by photos of the Welland Ship Canal.

"The Last Great Round-Up of Wild Horses" is a full account of the operations of cowboys from four ranches of Southern Alberta in their sweep of 25,000 horses from the plains.

"Search of Treasure" is another unusual story that adds to the value of Saturday's Magazine Section.

WESTERN GRAIN ROUTE SUBJECT OF BOARD OF TRADE RESOLUTION

Organization Requests Ottawa To Give Effect To Recommendation Of Commission, That Elevators Be Vested Under Crown Instead Of Harbor Board

The Edmonton Board of Trade yesterday passed a resolution asking the Dominion Government to carry out the terms of the special report made by the Grain Inquiry Commission after their last hearing in Vancouver, which the Commission recommended that terminal elevators at that port be taken from the jurisdiction of the Harbor Board and that control be vested directly in the Crown.

The text of the resolution is as follows: "Whereas, the Board of Trade of Edmonton is keenly interested in the development of the Western route for grain and grain products; and "Whereas, the Royal Grain Inquiry Commission has published a report containing certain recommendations with regard to the control, management and operation of the grain handling facilities at the port of Vancouver; therefore be it resolved: That in the opinion of the Board of Trade of the City of Edmonton the said recommendations contained in the report of the Royal Grain Inquiry Commission should be carried out in regard to the terminal elevators at the port of Vancouver, the date of the commencement of the new crop year."

A copy of the above resolution will be forwarded to the Provincial and Dominion Governments.

DEPOSITORS ISSUE LESS CHECKS IN JUNE

June Had Five Sundays, Is One Reason Advanced by Banks

OTTAWA, July 23.—The bank depositors' issue of checks declined in June to the lowest point in the history of the Dominion, according to statistics released by the Dominion Bureau of Statistics. The decline was due to the fact that June had five Sundays, which is one reason advanced by banks for the decline.

Nearly half of the decline was accounted for by the fact that the number of checks issued in June was 12 per cent less than in May. The decline was also due to the fact that the number of checks issued in June was 12 per cent less than in May. NO BLACK RUST IN CROP AREAS

Chicago Reports Of New Menace To Canadian Grain Denied By Experts

SURVEY MADE Investigation By Manitoba Agricultural College Shows No Trace Of Black Rust

WINNIPEG, July 23.—Reports from Chicago to the effect that black rust infection had developed in Southern districts of Manitoba, and was beginning to show in the northern parts of the province were denied today by experts at the Manitoba Agricultural College who have been keeping in close touch with the situation.

Investigations they say, show that rust traces are very general in the southern and central portions of the province, but that, however, very light and samples submitted to the department show only one or two clusters in the plant. The rust is in the red stage and so far no traces of black rust have developed.

The development of the rust, the college experts state, depends solely upon the weather from the present.
